Wow, this is great to have. Thank you. I had no idea about that penta area, just the buildings in that area. The incinerator I mentioned is shown too.

Do you have the PCB Remediation and Sewer Cleaning report, 1998? Too big to email but it shows the outfalls and is a good reference for some PCB work. Another good ref for outfall sampling and some benzyl alcohol detections is "Round 3 Data and Sewer Sediment Technical Memorandum, RCRA Facility Investigation (RFI), Dec 1996" also way too large to email. Let me know if you want either of them, Rick, and I can look in to our supposed ftp site.

Page 16, 24 and 25. Not much to go on. But it's a clue. There used to be 2 two outfalls that went to the river in this location.
